

Lab 6 (Solution)

Exercise 2: Daily Rainfall Data

Append the 3 months rainfall data (March, April, May) and determine the correlation between Mean Temperature, Mean wind Speed and Daily Rainfall Total.

Show the correlation matrix (screen shot from KNIME):

Which pair has the highest positive correlation?

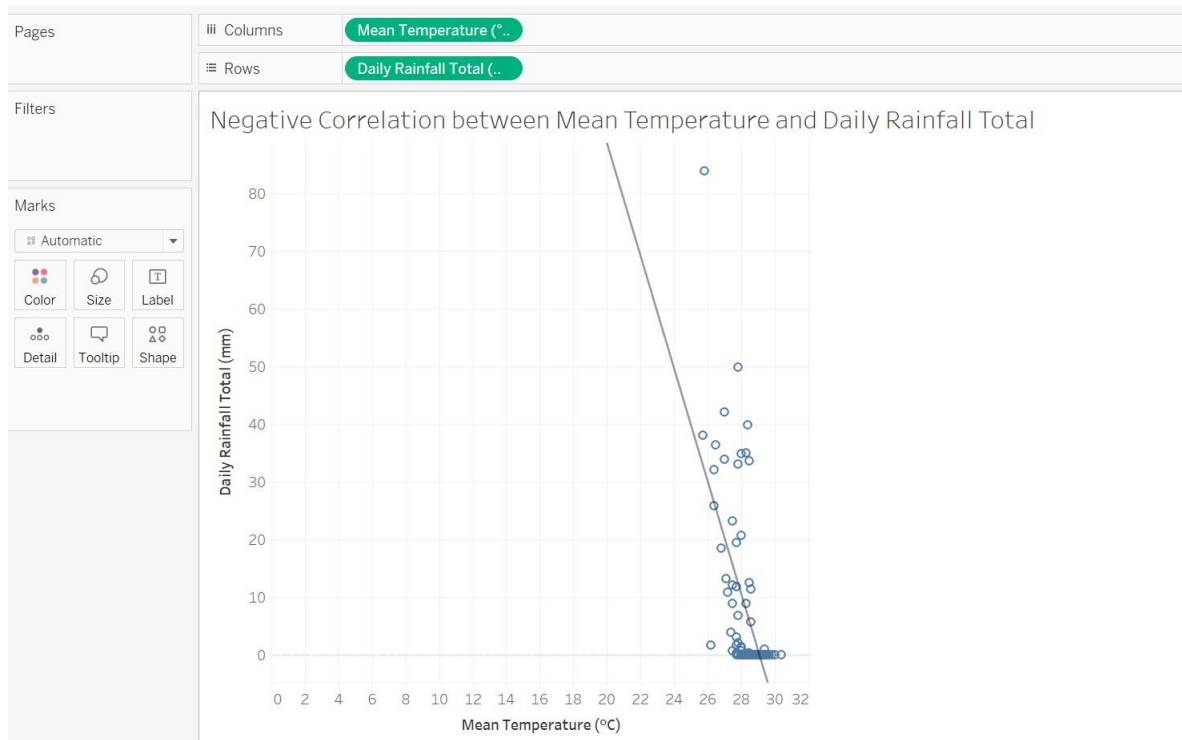

Ans: **Mean Wind Speed and Mean Temperature.**

Which pair has the highest negative correlation?

Ans: **Mean Temperature and Daily Rainfall Total**

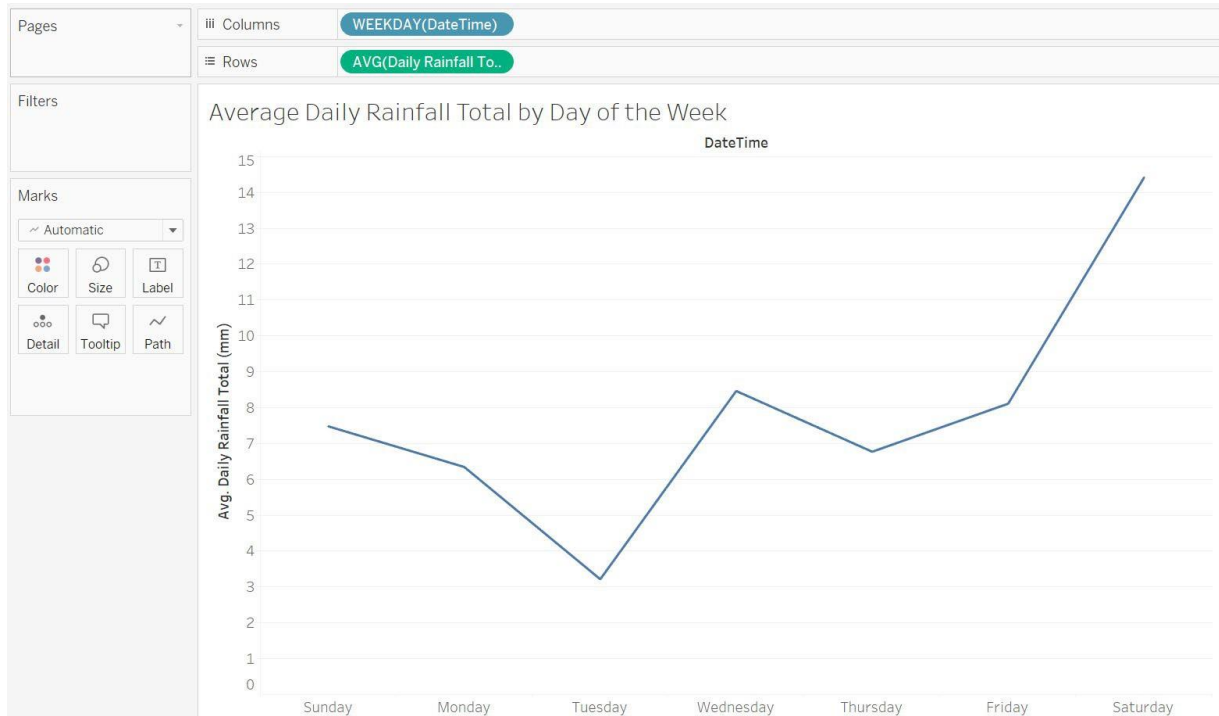

Read the appended 3 months rainfall data (March, April, May 2021) into TABLEAU.

Show the scatter plot of the highly negative correlated variables.

Exercise 3: Calculated Field

Show the line graph of Average rainfall total vs Day of the week.

Which day of the week has the lowest average rainfall total?

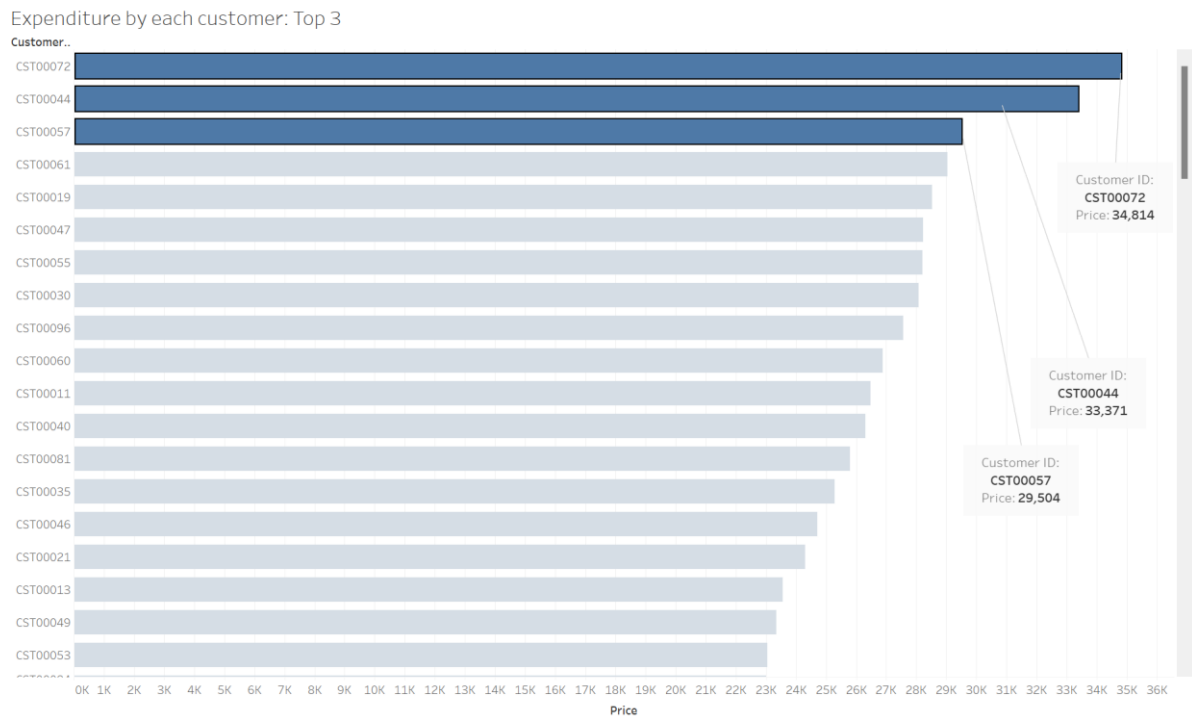

Tuesday has the lowest average rainfall total.

Exercise 4: Purchase_History.xlsx

Answer the following questions with appropriate **chart**.

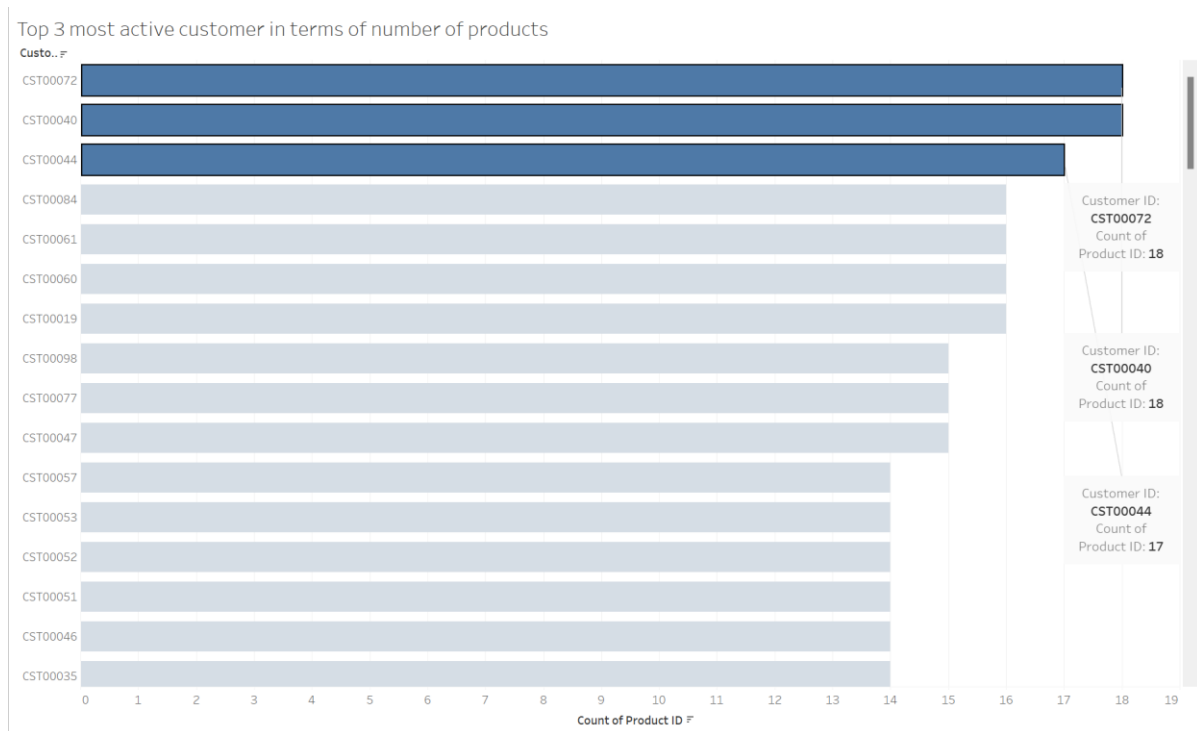

Q1: Who are the top 3 customers in terms of amount of spent (price)?

Show a suitable chart that answered this question.

Q2: Who are the top 3 customers in terms of number of products purchased?

Show a suitable chart that answered this question.

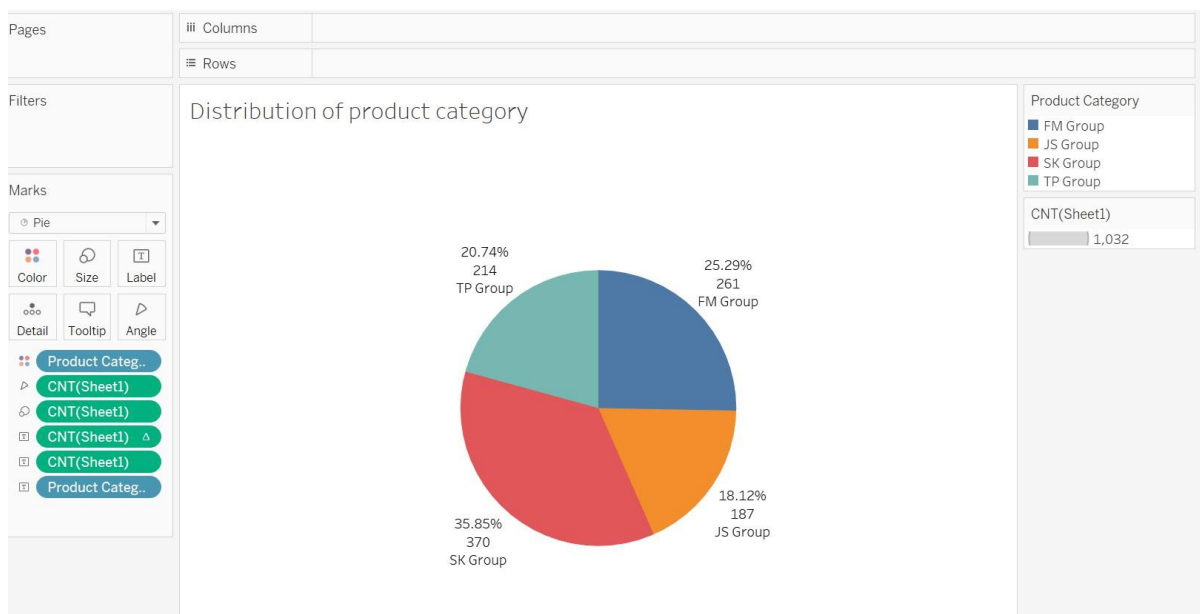

Q3: How many products were sold in each category?

(Note: you need to group the products base on the first 2 letters in the Product_ID)

Product Category refers to FM_Group, SK_Group, TF_Group, JS_Group

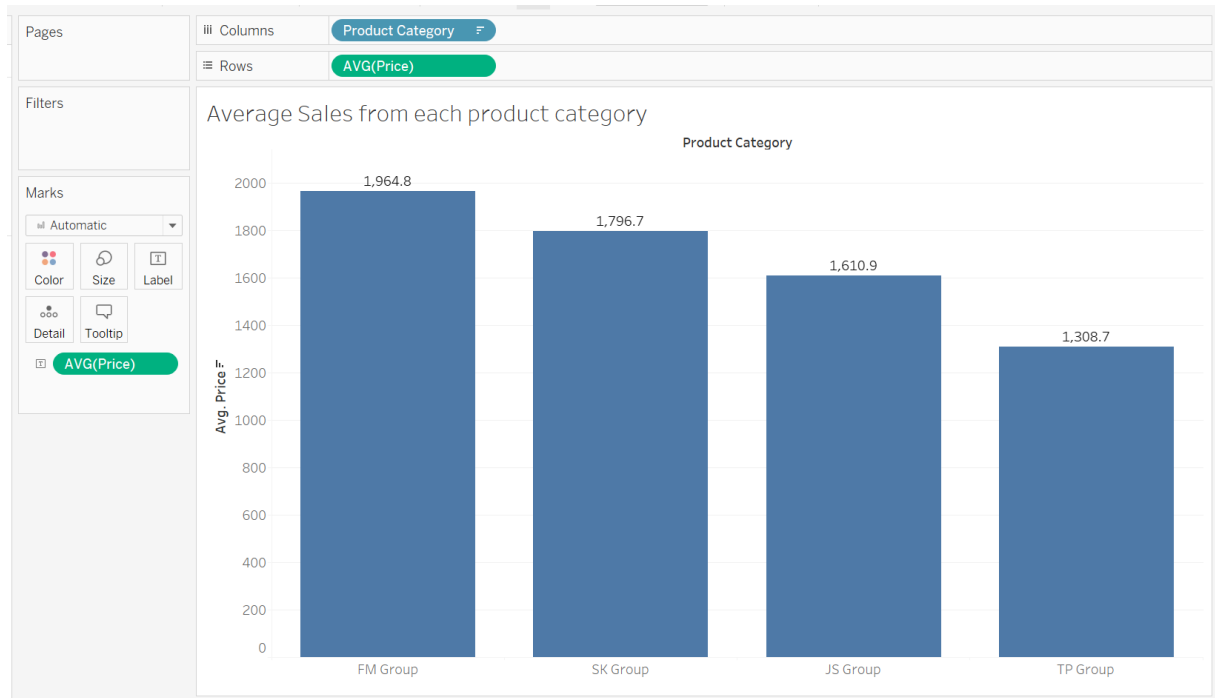

Show a suitable chart that answered this question.

SK Group contributed 35.85% of the sales number.

Q4: What is the average price for each product category?

Show a suitable chart that answered this question.

FM Group generated the highest average sales value.

Summary

Use suitable charts to answer your questions.

- Bar charts to show “count”
- Bar charts to show “value”
- Pie charts to show percentage of distribution
- Scatter plot to show correlation between 2 numerical values

Present your answers as insights. Example, most popular product; highest sales

When screen capture your charts, include the “columns/rows” and the side “Marks”.
Include legend if using colors.

Give meaningful titles to your charts.

Use annotation to highlight insights derived from the chart.

Perform necessary grouping for better insights.
